

YOU

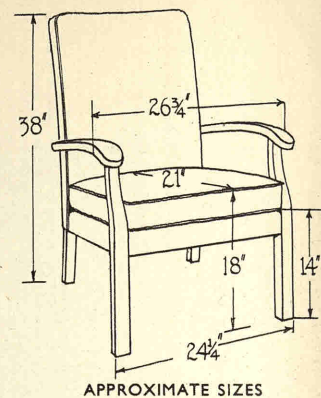

might expect the makers of Parker-Knoll chairs to be a rather self-satisfied lot—but you would be wrong. Unfortunately we are never satisfied. And that is why, in spite of the present manufacturing difficulties, we have produced these new designs for 1940. That is why in producing these chairs we have not relied on our judgment alone, but have made a most careful survey of the likes and dislikes of the people who are going to sit in them. Of course, we were not able to consult *you* personally—we only wished we could. But by studying the comparative sales of existing Parker-Knoll designs, and asking ourselves why one chair is so much more popular than another, we were able to draw the most valuable conclusions. So if you have never been lucky enough to sit in a Parker-Knoll, these chairs will make the moment more momentous; and if you have already decided that Parker-Knoll Suspension is the last word in comfort, these chairs will set you racking your vocabulary for fresh superlatives. And should you by any chance be moved to offer us your thanks, we shall answer modestly and at least half-truthfully, 'You designed these chairs yourself'.
