

Cornwell-Norton Long lasting comfort.

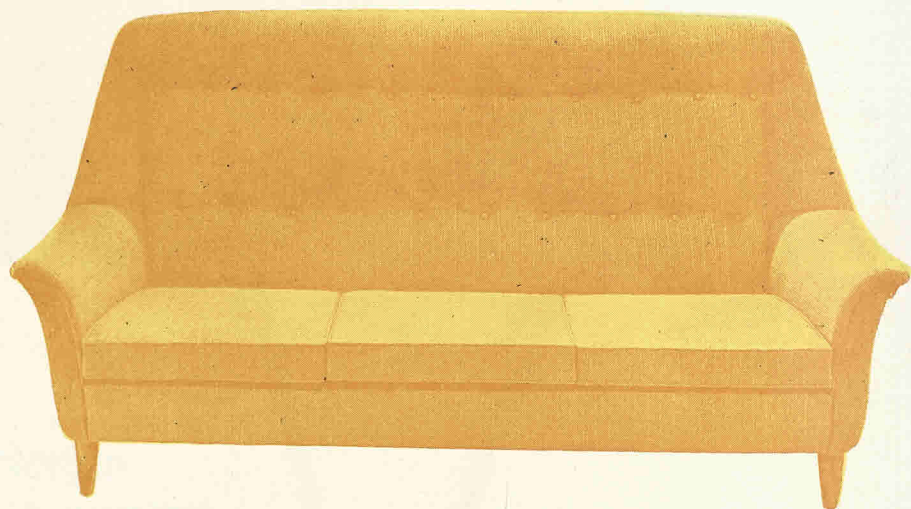

Cornwell-Norton Long lasting comfort

For long lasting comfort . . . Cornwell-Norton chairs and settees not only bring you advanced design, they bring you the lightness, strength and comfort of modern techniques of construction.

All Cornwell-Norton furniture is built to the highest standards. Standards that are laid down to ensure a Cornwell-Norton chair or settee will be as supremely comfortable in years to come as it is on the day you buy it. You will be glad you took the trouble to discover the 'inside' story of Cornwell-Norton chairs.

N5 ROVIGO An elegant, comfortable and strongly-built chair that is intended for waiting room and reception areas. It has a moulded shell frame and the metal legs are charcoal nylon finished. The inside of the chair is upholstered over latex foam and there is a fixed seat cushion.

N1 & N2 NOVELLA SUITE Deeply upholstered and covered in a choice of handsome, hard-wearing textured fabrics, the 'Novella' suite sets a new standard of modernity and beauty of line. The 'Novella' gives lasting comfort and compliments any room with an elegance that is both impeccable and exciting. Legs are in Teak, but Beech finished as Natural Beech, Light or Dark Mahogany or Ebonized, can be supplied.

N11 CONWAY A no-arms version of the Compton. Both chairs are offered in a selection of first-class, hard-wearing covers; an altogether more distinguished range of fabrics than you normally find on chairs at this price. These models are also available in Teak or Mahogany finish, and special joining clips are available at a small extra cost.

N10 COMPTON Simple, well-made, extremely comfortable, this chair reflects the clean composed lines of the best modern architecture. An elegant, laminated inner structure contrasts with the severity of the Natural Beech frame.

N14 COMPTON SETTEE A generous 3-seater settee in the modern Compton style, the interiors of the loose cushions being made from high quality latex. The robust construction will ensure years of long-lasting comfort. Available in a wide range of fabrics to match the Compton and Conway chairs.

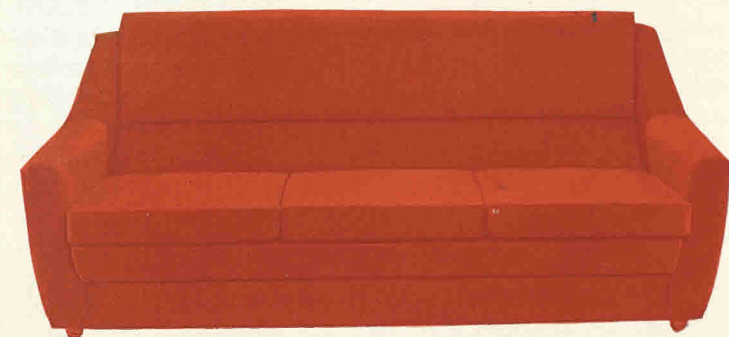

These two chairs are high-backed versions of the Compton and Conway incorporating all their advanced features, including an extended laminated inner structure supporting a pillow head cushion.

N.13 HIGH CONWAY

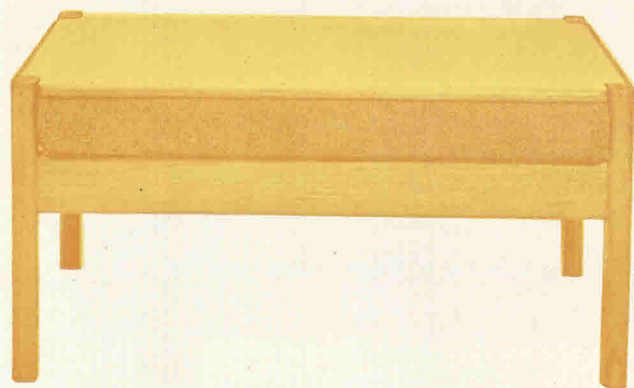

N.12 HIGH COMPTON

N19/20 SONATA A superb new suite designed to appeal to the connoisseur. Great care has gone into this design to ensure comfort with correct posture support. By varying the density of the foam we have made the lumbar cushion firm and the seats, head and back cushions deep and soft for really sumptuous comfort. Although the Sonata is a large, imposing suite, moving is made 'finger light' by the fitting of orbital castors.

N.7. TIVOLI STOOL/TABLE. The Tivoli, strongly made in Teak has been designed either as a foot stool, or as an occasional table. It has a dual purpose top with a latex cushion (which can be covered to match other C.N. chairs) on one side, and a Formica surface on the other.

N22 COMPTON STOOL/TABLE A beautifully made versatile unit that can be used as a formica topped table one side, or as a comfortable stool the other. The high quality latex cushion can be covered with a wide range of fabrics to match the Compton and Conway chairs.

N21 COMPTON TABLE A modern table with a laminated formica top, on a strong beech frame, pegged, mortised and tenoned to the highest standard. It has been designed as a companion to the successful Compton and Conway chairs and uses matching leg and rail sections. Height: 12½" Width and length: 22".

N23 LONG COMPTON TABLE A long version of the Compton table, incorporating the same quality of manufacture and design, but with an increase in length to 42". All these tables can be linked together simply by using the special N10 and N11 chair clips.

N17 CORSHAM DESK CHAIR An elegant design suitable for the desk or table. Correct shaping of the back support, together with a high quality polyether foam seat gives a standard of comfort rarely achieved with this type of chair. The frame which is manufactured from Solid Beech is well braced and bolted to ensure a long, trouble-free life.

N18 COPNOR DESK CHAIR An armless version of the successful Corsham chair built and upholstered to the same exacting standards. A wide range of fabrics is available to match other models in the Compton and Conway ranges.

Cornwell-Norton Furnishing Fabrics

Each year Cornwell-Norton take great care in selecting exciting new additions to their standard range of high quality fabrics. This is done to keep abreast of the latest trends in interior design, and ensures that Cornwell-Norton furniture looks right in even the most contemporary interiors. All the fabrics in the extensive range available that are used on Cornwell-Norton chairs and settees are thoroughly tested at the laboratories of the Retail Trading Standards Association. They are tested for resistance to abrasion and for colour fastness to light. They are only used if they pass both tests to the high Cornwell-Norton standards.

We reserve the right to revise without notice details of specifications and prices.
